⚙ StacyWilliams

I have experience as a Software Developer that includes working in a remote collaborative environment, pair-programming, and practicing modern technology standards. I love to learn and I'm always working to refine my knowledge as a professional but also personally. My goal is to work in a Full Time role as a Software Developer and bring together my love for technology and my curiosity of the world as a whole.

Current

An 8-week cross discipline collaborative project incorporating multiple data sets provided by the Data Science Team API and acrGIS's API to render the safest route for RV's.

ChefPortfolio

Sept. 2019 to Sept. 2019

After completing the node.js portion of the Lambda Full-Stack Curriculum I was the backend developer for a week long team project. I used node.js, express.js, SQLite during development, and PostgreSQL for deployments to Heroku   https://chefbook-stacy.herokuapp.com/api/recipes and /chefs.
